

Building Smart Customs to Advance Higher Level Security and Facilitation of International Trade

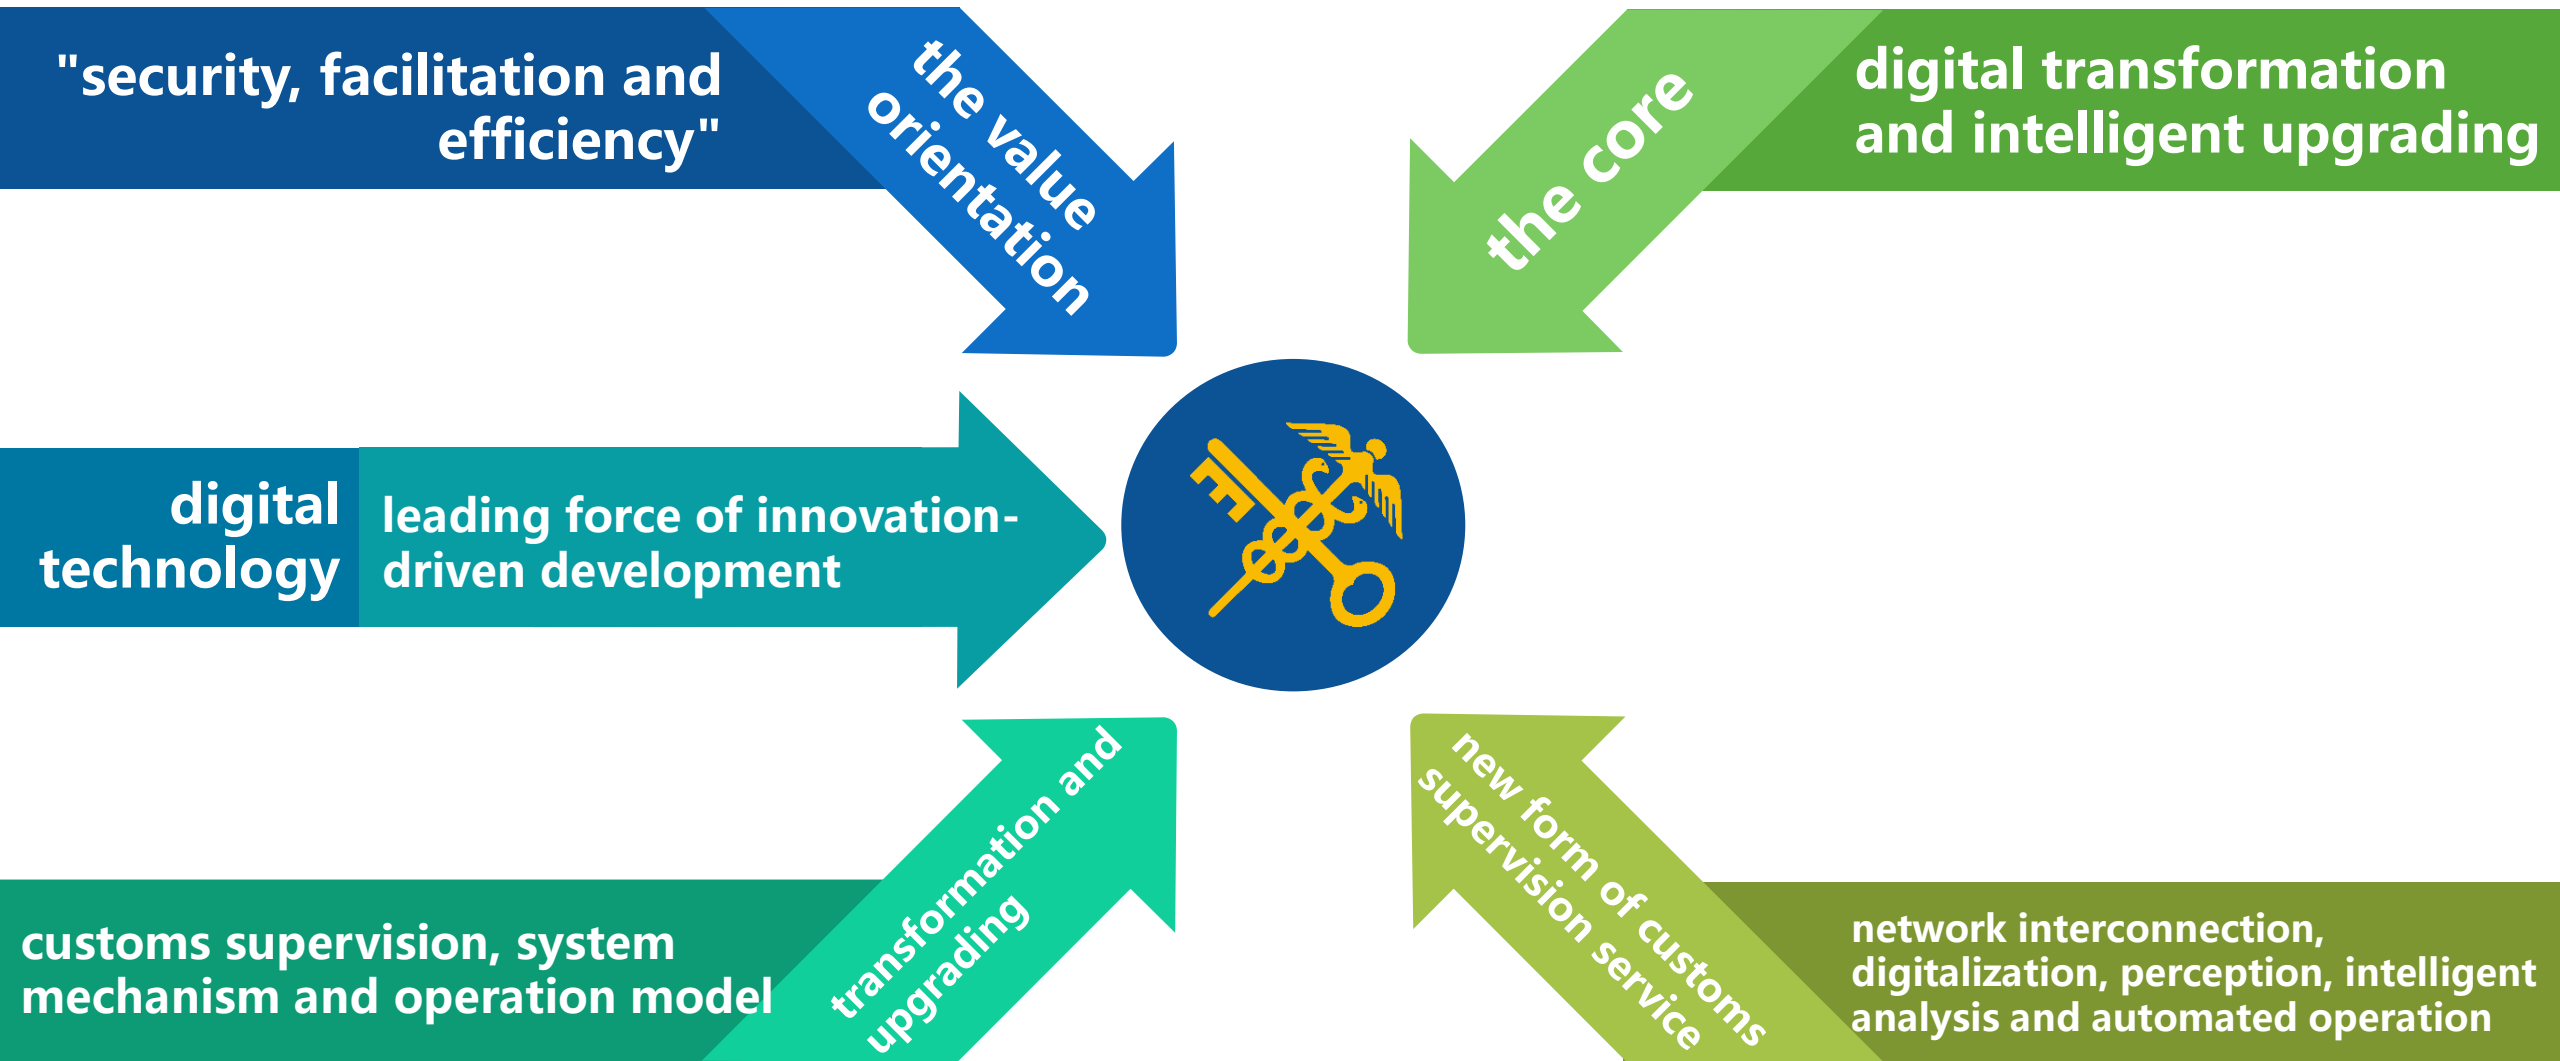

Li Yu

Department of General Operation
General Administration of Customs of the P.R.C.
April 2024

Background of Building Smart Customs

Overall Approach

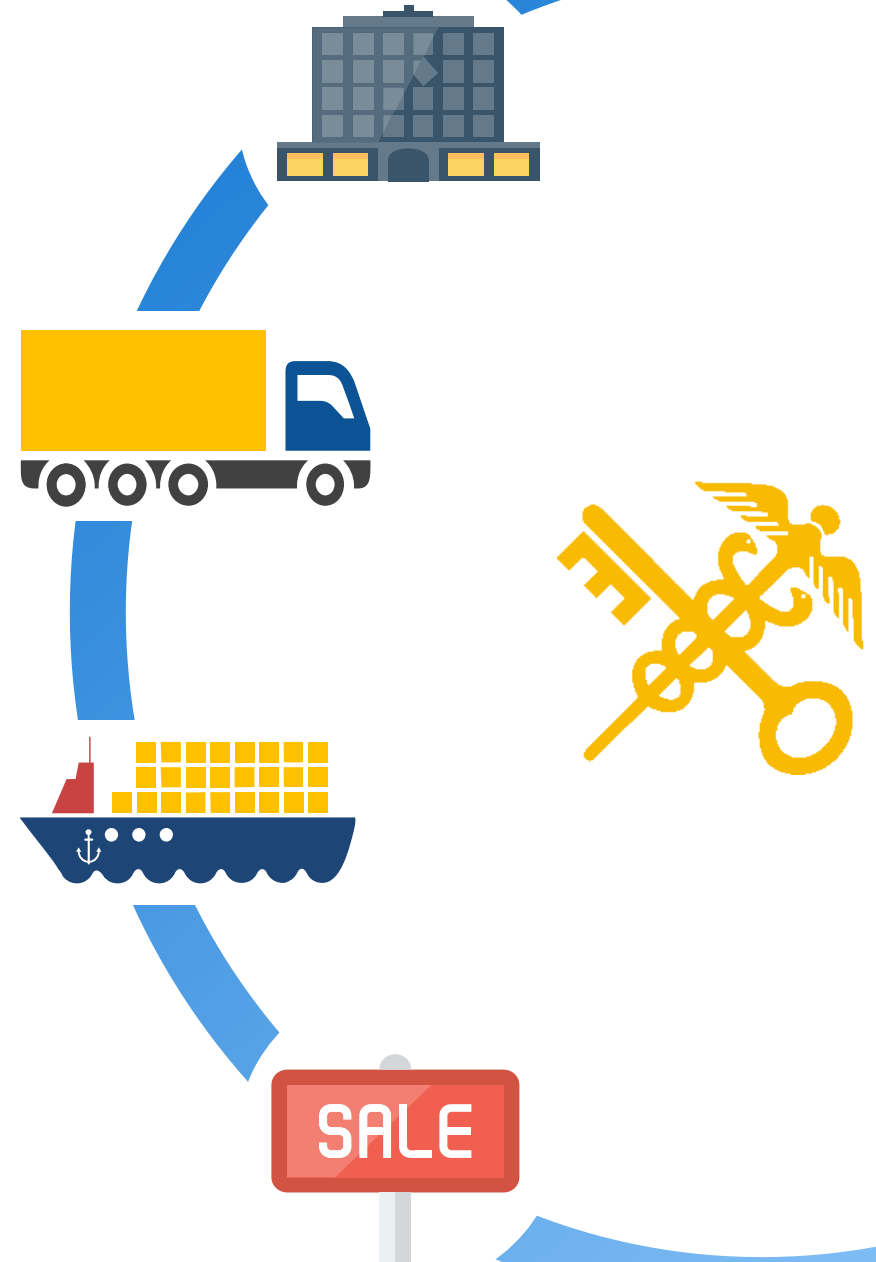

Overall Approach

First, to build the whole chain of rigorous and homeopathic supervision.

Second, to implement the whole process of multi-dimensional integrated risk prevention and control.

Third, to provide all-round convenient and efficient services.

Fourth, to ensure the smooth operation of the whole field of coordination.

Empowering Smart Customs with Technology

On one hand, we insist on data empowerment

Giving full play to the role of data as a basic resource and innovation engine

Established a sound system of customs data governance and standards

Empowering Smart Customs with Technology

On the other hand, utilize intelligent equipment and facilities to enhance the capacity of customs supervision services.

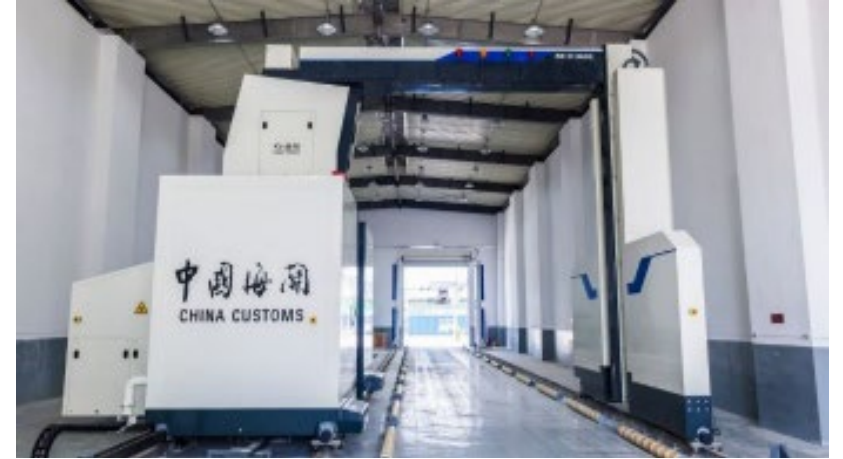

First, to promote more convenient Customs operation.

Second, to promote more efficient logistics and transportation.

Third, to promote smarter customs supervision.

In 2024, the construction of Smart Customs will enter into the stage of full implementation

Take further steps to the "Smart Customs"
cooperation partnership

Thank you!
